Knee180

THE 180-DAY KNEE TRACKER

Do a 180.

Two minutes once a month. A simple way to see how your knees feel, how far you walk and how easily you handle stairs over 180 days, written down in your own numbers.

Your check-in days: **Day 0** (before your first serving) · **Day 30** · **Day 60** · **Day 90** · **Day 180**

How to use this tracker

1. **Pick your Day 0.** Do your first check-in before your first serving. Write the date at the top of page 2.
2. **Score 4 everyday moves from 0 to 10.** Think about the past 7 days. 0 = none or no difficulty, 10 = the worst you can imagine. There are no right answers; just be consistent.
3. **Record your movement numbers:** comfortable walking minutes, average daily steps, the stair test and the 30-second chair stand.
4. **Plot your Total Knee180 Score** on the chart on page 3 and connect the dots at each check-in.
5. **Tick one box a day** on the 180-day calendar (page 4) when you take your serving. Consistency is the whole protocol.
6. **Same conditions every time:** same time of day, same stairs, same chair, same shoes.

Stair test: Use one ordinary flight of stairs. Time yourself going up and back down at a safe, comfortable pace, holding the rail. Never rush. Skip it if stairs feel unsafe.

30-second chair stand: Sit in a sturdy armless chair against a wall, arms crossed. Count full stands in 30 seconds. Have someone nearby. (Based on the CDC STEADI 30-Second Chair Stand.)

Stop and talk to your doctor if you notice significant swelling, redness or warmth, a knee that locks or gives way, discomfort after a fall or injury, fever, or anything that worries you. Don't wait for your next check-in.

This tracker is a personal log for your own reference. It is **not a medical device, test, or diagnosis**, and it does not replace advice from your doctor or physical therapist. Scores are self-reported and are not validated clinical measures. Do the movement checks only if they are safe for you. Knee180 is a dietary supplement. *These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease. Individual results vary.

Check-in scores

Day 0 date: _____ Think about the past 7 days for each score. Self-reported log only. Not a medical device, test, or diagnosis.

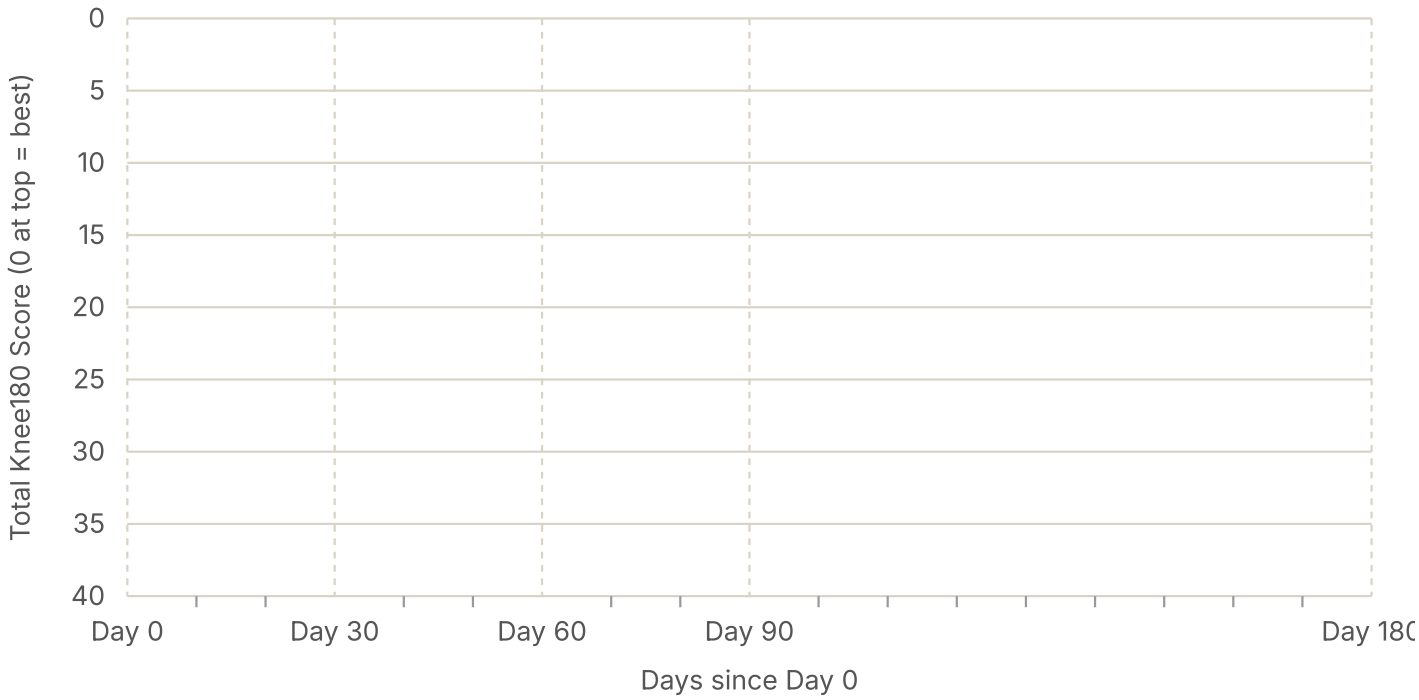

Everyday moves (0–10, lower is better)	Day 0	Day 30	Day 60	Day 90	Day 180
Knee discomfort during everyday activity 0 = none · 10 = worst you can imagine					
Knee stiffness after sitting or first thing in the morning 0 = none · 10 = extreme					
Difficulty going up and down stairs 0 = no difficulty · 10 = can't do it					
Difficulty getting up from a chair or the floor 0 = no difficulty · 10 = can't do it					

Totals and movement numbers	Day 0	Day 30	Day 60	Day 90	Day 180
Total Knee180 Score (add the 4 scores above, 0–40) Lower is better					
Comfortable walking: minutes you can walk at an easy pace before you want to stop Minutes					
Average daily steps last 7 days (from your phone or watch) Steps					
Stair test: seconds to walk up and down one flight (hold the rail) Seconds					
30-second chair stand: full stands in 30 seconds, arms crossed Count					

Notes (activities you got back to, days you missed, anything new):

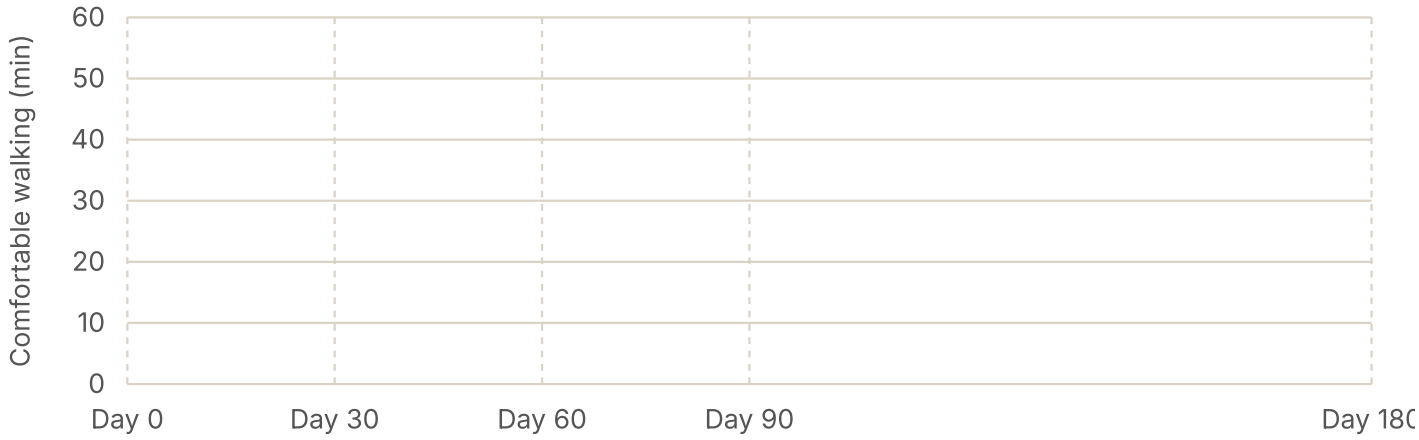

Your progress chart

Plot your Total Knee180 Score at each check-in and connect the dots. Lower is better.

Comfortable walking minutes

Plot how many minutes you can walk at an easy pace. Higher is better.

Self-reported log only. Not a medical device, test, or diagnosis. Results vary.

180-day serving calendar

Tick one box each day you take your serving. Circle Day 30, 60, 90 and 180, your check-in days.
